## Measurement and Scale

### Grade 5

11. Postal Express needs to deliver packages in four towns, which are along the same straight road in the following order: Riverside, Meadowbrook, Valleyview, Montclair. The company needs to create a map for the delivery person.

a. Draw a map based on the following information:

- 1 inch. = 40 miles
- Montclair is 240 miles from Riverside.
- Meadowbrook and Valleyview are 100 miles apart.
- Valleyview is 120 miles from Montclair.

b. How far is it from Riverside to Meadowbrook? \_\_\_\_\_

12. Using a scale of 1 cm = 20 km, draw a map in which:

- Maplewood is 90 km from Oaktown.
- Oaktown is 40 km from Walnut Grove.
- Walnut Grove is 100 km from Pine City.
- Pine City is 130 km from Maplewood.
